TypeScript, JavaScript/ES6+, HTML, CSS/SCSS, Ajax

#### Libraries

React, Redux, Bootstrap, Material UI, Ant Design, Axios

#### Web Services

REST API

#### Testing

Jest, StoryBook, Postman

### PROFESSIONAL HISTORY

---

#### Freelance

Front-End Developer | April, 2021 - Present

I am creating an application from scratch that can be used as a social network or can be adapted to a forum. The application is developed on React + Redux. Development is based on functional components, React Hooks and other modern tools. For requests to the server, the Axios library is used. The application is currently under development and is constantly being updated.

#### Freelance

Front-End Developer | April, 2021 - October 2021

- Created WordPress plugin and set up a personal account for "Childhood" website.
- Built a landing page from scratch for a local transport company, "UBER Partners". The website developed according to the BEM methodology using the Bootstrap library.
- Created website functionality for "IRWAS windows". Installed and configured the Slick Slider plugin.
- Built a landing page from scratch for "RunSmart" according to modern standards HTML5 CSS3 / SCSS. Installed the Mailer plugin to send emails without a server.

**EDUCATION:**

---

2022 - 2026 | Really Great University  
Bachelor of Computer Science - Software Engineering
