PROFESSIONAL HISTORY

Freelance Web Developer   **Upwork**

Apr 2020 - current time

- Worked on software development projects as a freelancer with several clients including Childhood Company, UBER Company, BiEf Group Company. Gathered requirements, produced cost estimates, and developed web-based applications. Used **HTML5** for markup building, **SCSS** for stylizing and creating animations. Implemented functionality on websites - **JavaScript** (slider, parallax, forms etc.).
- Developed of a **Childhood** company website theme for WordPress. Creation of a presentation slider, product cards, feedback form, interactive map, etc.
- Developed of a landing page for a taxi company, **UBER Partners**.
- "Irvas" corporate website developed for **BriEf** company.

- Developed an online store for the **RunSmart** company for the sale of heart rate monitors.
- Participated in the development of a social network on **React** - **Redux**, created the components of the user page, messages and contacts (friends). To create the UI used the **Material UI** library. **Axios** used for requests to the server to get data about users, messages, etc. Tested app using **Jest** and **Postman**. Worked in a team of 4 people. Received a task from the team leader and reported to him on the implementation. Created pull requests for **GitHub**.
- Currently, I'm working on "Cards" application. The App for learning, similar to Quizlet App. The part of registration, login, password recovery, creation, editing, deletion and receipt of all cards has been implemented. Also sorting, filtering and much more. TDD technology is used to create an application. To build an application, I use the React - Redux library, for UI - Material UI, for working with forms and validation - Formik, Axios - for server requests.

Skills: HTML, CSS, JavaScript, React, Redux, Material UI, REST API, Jest, WordPress, PHP, conflict-resolution, time and priority management, decision-making, problem-solving, critical thinking.
